Termi Guard® Aerosol

Termi guard is convenient and ready to use Aerosol instant wood protector for household use and is preferred for an instant remedial application. Its use stops powder falling problem from wood instantly and protects treated wood for its life time from termites and borers.

F.M.C.G. PRODUCTS

Cockroach Guard™ Aerosol

This is made with proprietary herbal formula (using capsycin, citronella, marigold, peppermint oil and Anacardium Pericarp extract's azeotropic distillate + fragrance and solvent) and it terminates cockroaches most effectively. It is non-toxic and harmless as well as eco-friendly. It is used for effective control of cockroaches in household.

ANTI - TERMITE PRODUCTS

Timber Guard™

Timber guard is of similar use as Termiguard, but is medium brown in color since it is not azeotropically distilled but filtered through very fine mesh sieves for removal of free particles of foreign materials hence more economical in price. It is used for prevention of termites on wood where a slight change in color to brown is acceptable.

Termi Guard®

This is a ready-to-use botanical product for wood preservation, control of Termite infestation and fungus for effective protection of plywood, wood and furniture. This is eco-friendly and harmless to human beings and pets as proven over use during the last century. This is colorless and does not affect the color of furniture, ply or wood. Its application increases the life span of wood by 5 to 7 years.

Termi Guard® Super Power E.C.

This is an emulsifiable concentrate made from Botanical extract of Anacardium Pericarp Extract by azeotropic distillation subsequently concentrated with evaporation and addition of suitable emulsifiers so that it is diluted by addition of water before use for protection of building foundations and soil for prevention from termites and wood eating pests to prolong the life of building structures. This is also used in manufacturing of termite resistant plywood by mixing in the glue used for manufacturing plywood or hardboard. It is used by mixing in exterior paints to prevent weather resultant dark spots due to fungus to prolong the life of paints. It is used widely for household pest control and is ideal for treatment of soil and structures for prevention of Termites infestation.

ISOLATE™ ACQ-D

This is a new era wood preservative to protect wood against decay-fungi and insects. It is a copper quat system. Copper serving as a primary benign biocide and quat as a secondary biocide which interacts synergically with the copper to improve the efficacy of the treatment. It is useful on wider selection of timber species for maximum efficacious treatment. This eco-friendly wood preservative has proved as the most appropriate wood preservative to replace CCA (Chromated Copper Arsenate) a highly toxic chemical which was in widest use in the world and has been banned in 2005 by EPA. In fact more than 65% of wood treatment plants in U.S., Europe, Australia, Japan and South Africa who were using CCA earlier have already switched over to ACQ-D Copper quaternary wood preservative. It is used for protection of wood products in wide range of applications where protection from biological degradation is required.

HARDWARE & MAINTENANCE PRODUCTS

Sahnstherm™ - Thermal Insulation Coating

This is a Ceramic Thermal Insulation Membrane Coating used for keeping inside of premises cool, preventing heat transfer and permeation and provides convenient and comfortable living space. It reduces building decay and prolongs maintenance cycle. It protects buildings from thermal stress resultant structural or building damage. It offers elastomeric water proofing, seals and prevents cracks and leaks. It saves 20 to 30% energy consumption in air conditioning of premises. It is anti-carbonation, antiUV, anti dirt and antigrease. It is used on Asbestos sheets to stop release of asbestos particles and! prevent carcinogenic effect. It is non-toxic, water safe, and environment friendly and is easily applied and maintained while being non-combustible and has fire rating Class "O". It is widely use (on roofing and sidewalls. Cold storages, Refrigerated tanks, Air conditioned buses and coaches roofs, warehouse roofs and walls, in commercial, Industrial and residential buildings. Oil storage tanks, drying and baking ovens, hot and cold liquid piping systems, poultries (to reduce bird death due to heat and increase bird weight) porta cabins and numerous applications.

HARDWARE & MAINTENANCE PRODUCTS

Aqua Safe™ PVC Solvent Solution

This is a transparent PVC solution which is non-toxic to water and is used for joining sockets, bends, tees etc. to pipes of fresh water flowing and transferring pipes.

Duraweld™ cPVC Solvent Solution

This is a transparent PVC solution which is non-toxic to water and is used for joining sockets, bends, tees etc. to pipes of hot or high pressure water flowing and transferring pipes.

Stickwel Bond™ - Synthetic Rubber Adhesive

It is a multipurpose synthetic Rubber Adhesive for bonding sponge, screen cloth, leather, rubber, board, cloth, paper, thermal insulation materials, metal sheets, ABS plastics, fiber glass, phenolic board, veneer, wooden planks, plywood and EVA etc. It is a multi-use, multipurpose excellent adhesive.

Termicol™-SH PVA Synthetic Resin Adhesive

This is a PVA emulsion based synthetic resin adhesive for use in furniture manufacturing having herbal Anacardium Pericarp Extract (Cashew Nut Shell Oil extract colorless) engrained in it by emulsification for termite repellence for affording a longer life to the wooden furniture. Termicol SH is the only termite repellent wood adhesive offering lasting strong bond and pleasant smell.

WYN-U Roof Guard™

This is an asphalt based pliable plastic roofing cement used on damp as well as dry surfaces. This is ideal for most of roof repairs and for stopping roof leakages around vents, pipes, valleys, spouts, gutters, troughs, chimneys, sky lights and for repairs of flashings.
